Regulations established to encourage and facilitate student mobility are summarized below:

An Erasmus/HUSBİK information meeting is held and organized once every academic year by our departmental Erasmus+ Coordinator, open to all students within the department. Notifications regarding these meetings are conveyed to our students via message at least one week prior to the event. During the meeting, the coordinator provides comprehensive information on exchange programs and their objectives, application processes, acceptance criteria, and personal experiences. Furthermore, the meeting agenda includes presentations where students who participated in mobility programs in previous years share their experiences.

In addition to departmental meetings, students are encouraged to attend faculty-wide meetings through announcements posted on departmental boards and notifications sent via message. Moreover, the departmental coordinator designates and announces one hour of the weekly academic schedule as Erasmus+ Counseling Office Hours. This arrangement enables students to schedule appointments and conduct one-on-one consultations with the departmental coordinator throughout the academic year. Additionally, the coordinator informs students via message when application periods open and displays the application calendar and guidelines on the office door notice board throughout the entire process.
